Assignment 3

Description of the Business: In my website I am selling protective gear to stop the spread of the deadly COVID-19 disease. The structure of the website is built to be seen as something simple, and easy for customers to quickly buy their products. It is more of a fundraiser for people who are sick, and for hospitals who need it the most, that is why face masks, face shields, and a 100mL hand sanitizer is the top products people are trying to buy.

Feature/Content Explanation: One of the features that I would like to add is bitcoin, PayPal, credit card payment methods. Reason why I would like to add those features is because every website that runs a business needs a payment method for their customers. Also, to create a sponsorship or a partnership with another company to make my business look more legit and to get more customers around the world.
